Environmental Policy

We recognise that our operations have an effect on the local, regional and global environment. As a consequence of this, the management are committed to continuous improvements in the environmental performance and the prevention of pollution. Environmental regulations, laws and codes of practice will be regarded as setting the minimum standards of environmental performance.

Specific Policies.

- **Energy Use.**

The company will use environmentally safe energy sources.

- **Resource Consumption.**

We will conserve resources through efficient use and careful planning e.g. Cisternmisers in the washrooms and high visibility wall mounted warning lights above the warehouse heating oil burners.

- **Recycling.**

The company maintains that a primary part of its environmental strategy is sustainable waste management and as such recognises its responsibilities to recycle materials wherever possible, eg. Paper, metal scrap, oil and batteries.

- **Disposal of Waste.**

We will dispose of all waste through safe and responsible methods i.e. rubbish collection.

- **Training personnel.**

We will implement our policies through training.

- **Transportation.**

Through coordinating route planning and delivery schedules this company seeks to realise the dual benefits of reduced fuel consumption and lower exhaust emissions eg. efficiencies achieved through Rollovers/Moves and the use of outside transport where appropriate. Where practical goods are collected as part of the delivery rounds.

- **Audit.**

This policy will be reviewed annually.
